

WI PDM Task Force - WI Technical Implementations & Standards Subgroup
 Subgroup Leader: Bill Cozzens

Initial Tasks:

1. Solicit and compile a “storehouse” of parcel models being used in Wisconsin and elsewhere that maybe of interest and importance. Upload schemas to FTP.
2. Compile list of Region/County/City parcel maintenance members/roles.
3. Assess and evaluate specific features that are common to many of the examples and identify unique features that potentially could become “WI Parcel Framework Model”.
4. Build crosswalk diagram, identify gaps in model needs.
5. Assess implementation variations from the base “ESRI/Nancy von Meyer Parcel GDB” from the gathered examples and/or FGDC recommendations.
6. Build interoperability workbench to translate (harvest) relevant data into state parcel framework model.
7. Create a Wisconsin series of best practices, a end user guide to creating/maintaining the parcel framework. Also including would be migration strategies, workflow review guidelines/checklists, and enhancement techniques.
8. Document findings from above.
