

# Wisconsin Land Information Association 2016 Pre-Conference ESRI Training **Introduction to ArcGIS® Pro for GIS Professionals**

---

Learn essential ArcGIS Pro terminology and get prepared to efficiently complete many different tasks related to mapping, editing, geoprocessing, and analysis. ArcGIS Pro, the newest application included with ArcGIS 10.3 for Desktop, is designed to help GIS professionals complete their projects and share their results more quickly and easily than ever before. With its modern ribbon interface and tight integration of 2D and 3D capabilities, ArcGIS Pro will streamline the way you do your GIS work.

ESRI will provide the following software and computers to use during class:

- ArcGIS 10.3 for Desktop (Advanced)
- ArcGIS Pro 1.0 (Advanced)
- ArcGIS 10.3 Spatial Analyst
- ArcGIS Online
